To whom it may concern:

We started using Kleen Fuel Combustion Enhancer a few months ago. We were quite skeptical in the beginning because we had tried additives through the years that didn't work.

Kleen Fuel Combustion Enhancer was quite different. The product has exceeded our expectations. We had a tractor that came into our shop for service. It had been issued a summons for failing to meet current emission standards in the State of New Jersey. The passing percentage for this tractor was 55%. When our shop tested it, the reading was 96%. After several hours of service we reduced it to 66%. The vehicle was still failing. We then poured Kleen Fuel Combustion Enhancer into the diesel fuel. We drove the tractor a few miles, and then we tested the tractor again. To our amazement, the emission had dropped to 30%.

We continue to use Kleen Fuel in our repair shop, and highly recommend its use to our customers.

Sincerely,

Bruce Underwald
