TRUMBULL DIVISION

To Whom It May Be Concern:

I have been using Kleen Fuel combustion Enhancer in my nine (9) 1.2 MM BTU # 2 Oil furnaces for the last eight weeks.

Before using this product, we had to clean the burners every eight (8) to ten (10) days because of the sulfated ash build up. This work was done on Saturdays.

For the last eight (8) weeks, we have not had to clean any of the burners. Our fuel consumption has also been reduced by seven (7) to eight (8) percent.

The manufacture has recommended that I reduce the nozzles on # 2 oil burners by 12% in order to reduce my fuel consumption even more.

We also have # 6 oil burners and boilers which I will be testing in the future.

After using this product, I have reduced my air emissions, lowered my fuel consumption and saved on maintenance cost.

This Product is truly amazing

Sincerely,

A handwritten signature in black ink that reads "Kartik Patel".
