To Whom It May Concern:

I have been testing Kleen Fuel Combustion Enhancer, in my shop for the last six months. I have found it to reduce Emissions in problem vehicles and extend the life of these vehicles in my fleet. The results have been remarkable. We are continuing to test and we are considering use in all vehicles. I have not had the results we have experienced with any other additive.

I have a diverse fleet of over 1300 vehicles from gasoline driven to diesel off road equipment. I can be reached for further comment at the above letterhead numbers. This product works with both diesel and gasoline and I believe it is truly amazing.

Sincerely,

A handwritten signature in black ink, appearing to read "Raymond J. O'Grady".
